

A staff member passed the car wreck as it happened. He called our EIC, who mobilized a team to cover the situation immediately. Nathan Witt interviewed bystanders, law enforcement, and a driver involved in the wreck. Luke Spence captured footage and photographs of the wreck. Brynna Williamson took visual notes and compiled information from Nathan's interviews to write a script. Luke Spence used social media to acquire first-hand video of the fire from a peer and used it with his own footage to put together a video package based on Brynna's script. Nathan read the script. The social media coverage was published before the road crew was finished cleaning the wreckage.
